Time Stamp

TP-50

SEIKO

Print more than just time & date and up to 2 lines

2 Lines printing
Get two lines printing by one action.

4 Print patterns
Up to 4 print patterns (print sets) can be registered. Just select a desirable print set when you punch.

PC configuration
Setting file configured on PC can be installed to TP-50 via USB memory stick.

Intuitive operation
Graphical display with texts and icons enables you to operate TP-50 intuitively.

Recommendable location and application

Bank
Stock broker
Auto repair shop
Hotel
Pharmacy
Laundry shop
Daycare center
Delivery depot
Hospital
Parking lot

and more!

Any place for time management

- Job-costing
- Time attendance
- Delivery / Dispatch
- Ticketing / Validating
- Check-in / Check-out
- Document issuing / Receiving
- Recording transaction

See reverse side for details.

For More Convenient Use

• Versatile Numbering Counter

TP-50 offers flexible counting: Count-up/down, counting within the limited range, repeating numbers, counting in an endless loop. It's convenient for ticketing, and many other applications.

• Customized Comments

TP-50 can have up to 8 formats, which you can make as you like, named "customized comments". You can choose and make your own print set from the 8 customized comments which you make, and 29 preset formats.

• Shifted Time Printing

Not only current date and time, but shifted date and time to the future (up to 14 days 23 hours 59 minutes) can be printed. It's useful for showing get-ready date and time, expiry and so on at any shops and places where fee is charged per hour.

• Easy alignment of print position

Using "Slide Lever" on the bottom and "Paper Guide Gauge", you can fix print position on your paper. Furthermore, you can easily find printing position through the slit on the bright print stage.

• Weekly Program

By combination of weekly programs, you can control printing lock, print pattern selection, and selected print pattern. For example, you can limit printable print set or even can prohibit punching during out-of-office hours.

• Punch Data Pick-up:

Punch data with a value of numbering counter is stored in the device (up to 1,022 data), and the data can be picked up by USB memory stick.

To use all functions, you need to configure them on PC and install the setting file via USB memory stick.

General Specifications

Print	Print system	Dot matrix printing (9 pins)
	Print color	Mono-color (Black #TP-1051N)
	Print lines per punch	up to 2 lines
	Print lengths	160 dots (approx. 20 characters) per line
	Adjustable print margin	up to 30 mm (1-3/16") from the paper edge
	Print direction	Left / right
	Print alignment of each line	Left / center / right
	Paper guide gauge	Available
Contents	Hours	AM/PM / 24 hours
	Minutes	1/60 / 1/10 / 1/20 / 1/100
	Seconds	Yes
	Leading zero	Yes (for month, date, hour)
	Print sets	up to 4 (3 of them require USB configuration)
